please reject the NAB's petition 04-160i have been a xmradio listerner 2 years now and love everything about it. since i pay for the service i can decide if i want it or not. since they started the instant traffic & weather updates its been a life saver for me. the rush hour traffic in my area is bad and being able to get up to the minute reports allows me to travel the roads not tired up in a traffic jam. the am/fm stations only give updates hourly or even worse the traffic report is outdated or just plain wrong. as someone who pays a fee for xmradio service please let us have our traffic & weather updates. thank you
